Market Technical Outlook

The Nifty opened on flat note, but as day progress we witness some selling pressure from higher level. On the daily chart, we are observing two “Narrow range” body formation which indicate we can witness some consolidation. In the upcoming session, if Nifty sustains above 25080 it may extend its move toward 25,150–25,220 levels. On the downside, support is placed at 24,980–24,950 levels.

We continue to maintain our stance that current price action gives an early indication that the correction within the broader uptrend has likely ended, and the continuation of the uptrend is resuming. Traders are therefore advised to adopt a cautiously positive stance, with stock-specific opportunities likely to remain in focus.
