Market Technical Outlook

The Nifty opened on a subdued note but momentum on the upside intensified as the day progressed which led nifty to close in green. On the daily chart, prices tested the 21-days SMA (25865) and has close well above it by forming a bull candle. In coming trading session, if nifty trades above the all-time high of 26277 then it may test 26320 – 26410 levels. On the downside, 26100 – 26000 levels may act as support for the day.

We maintain our view that the overall trend remains positive, with buying interest emerging at lower levels, which may drive the Nifty toward its all-time high or even higher. Hence, traders are advised to adopt a cautiously optimistic approach and focus on selective, stock-specific opportunities.
