### Market Technical Outlook

The Nifty opened lower but witness smart buying from the day's low which led the market to close in green. On the daily chart, we are observing that prices are trading above 10&20-days SMA which suggests the underlying sentiment have turned positive. In the coming trading session, a sustained move above the of 26,230 could open the door for further upside toward the 26,290 –26,380 zone. On the downside, the 25980 - 25870 range is expected to act as a support band.

**We continue to maintain our stance that the overall structure remains bullish. A sustained move above 26,277, confirmed by two consecutive daily closes, may trigger an upside toward the 26,500–26,800 zone over the next couple of weeks. Therefore, adopting a buy-on-dips strategy remains the preferred approach in the current market environment.**
