Market Technical Outlook

The Nifty opened higher and traded with positive note throughout day. On the daily chart, a bullish candle has formed, but prices touch the upper trendline, however, prices continue to trade comfortably above the 30-day SMA (25,022), and 50-day SMA (24,891), indicating that the broader undertone remains positive. In the upcoming session, if Nifty sustains above 25,350, it may extend its move toward 25,410–25,480 levels, while on the downside, support is placed at 25,250–25,180 levels.

We still continue to maintain our stance that current price action gives an early indication that the correction within the broader uptrend has likely ended, and the continuation of the uptrend is resuming. Traders are therefore advised to adopt a cautiously positive stance, with stock-specific opportunities likely to remain in focus.
